To whom it may concern,

Roseacre Wood – Data Collection Note

Cuadrilla has appointed Vectos as its new highways expert to examine the options for mitigating the impact of Cuadrilla's proposed operations at Roseacre Wood on highways safety and Vectos have commissioned a suite of further traffic and highways surveys. These surveys will be undertaken over summer 2017 and we envisage they will be completed by the beginning of September 2017.

We have recently met with Lancashire County Council (LCC) in order to discuss the surveys and I enclose a note for your information that has been issued to LCC that summarises the proposed survey specification. The surveys will be undertaken by independent survey companies in accordance with industry standards. The surveys will seek to establish an agreed baseline position from which the parties can consider the effects of the proposed operations on highway safety.

Once the data has been collected we will provide an update.

Yours sincerely

David Bird
Director
for **Vectos**
