Sir/ Madam

I am raising objection to the application to remove the right of way from Footpath 60, Wolfstones Road in the Holme Valley in West Yorkshire. I am surprised you are even considering this as our local council has declined and given very definitive reasons for doing so. This valley has a long heritage of right of ways and of keeping fit by walking and enjoying our beautiful environment. Wolfstone Heights is a part of that Heritage and so is Footpath 60. I use it regularly as do many of the valley inhabitants, my parents used and grandparents and great grandparents..it is a long standing footpath and right of way. And suddenly newcomers arrive and buy a house that they are aware has a public footpath near it and they want to change hundreds of years of right away because they want to. I feel this is very wrong of them and yourselves to be considering undermining the long held tradition of a valley. We walk, we ramble and have traditional days of walking. And yet rich newcomers and your dept are willing to take this away. I object strongly at such behaviour as do many others. Surely the answer to these people is No and do not buy a house knowing there is a footpath, thinking your arrogance can take it away from the community. Kirklees said No. now you do right by this valley and its people and say no.

Thank you.
