AMENDMENT TO MY PREVIOUS EMAIL

Please disregard my previous email, I have just been discussing my objection with a walking friend and I am HORRIFIED to realise that the path I had objected to is actually the one I want to keep!

In fact I simply cannot even believe that this motion is in place, the new diverted path is so superior in every way I just assumed that it was the Current Path and I can't for the life of me understand why anyone would want to propose it be reverted back to the original path!

So, please rescind my previous email and take this as notification that I fully SUPPORT the new path and find it so surprising that anyone would oppose this, it provides a much more pleasant walking experience and just seems like a common sense place to have the path, with far better views!

To whom it may concern,

I would like to express my concern about the campaign to change this footpath.

I am an avid walker and regularly use this footpath and those in the surrounding area.

My address is so as you can see I live locally.

I would like to record my OBJECTION to the making of the proposed order - I very much wish to KEEP Holmfirth Footpath 60 on its current line.

It is a well maintained and pleasant path (unlike so many others!) with clear signage!

Please confirm receipt of this email so I know my objection has been registered.
